

Horticulture Spray Equipment Shed

Herrick Archives Number H 324

A. IDENTIFICATION & LOCATION

1. Name

No name for this building has been found. It was used to house spray equipment for the Department of Horticulture.

2. Location

2.1 Located at 1957 Coffey Road, on the site of the present Howlett Greenhouses (Building 297). The number 1957 is arbitrarily assigned for indexing purposes. See sketch below.

2.2 For greater detail, see Sheet 80 in the book of campus maps in the University Archives.

For identification of other buildings shown, see Appendix A.

3. General Description

This was a frame building about 15' x 30' with a 10' x 15' lean-to on the east side. These sizes are estimated from Sheet 60 in the book of campus maps in the University Archives.

B. HISTORY OF THE BUILDING

1. This building appears on a 1958 map and on the July, 1963 edition of Sheet 80 in the book of campus maps in the University Archives, both of which were based on the same aerial surveys. However, the building cannot be located on any aerial photographs back to 1938. It appears that the outline appearing on the 1958 map and the Sheet 80 represents only the concrete slab of this building.

2. Professor Emeritus Lawrence E. Kunkle recalls an earlier building at this location used to house spray equipment for orchards located earlier in this area. These orchards show on a 1933 map, and Professor Kunkle believe that they were planted in the early 1930's.

Professor Kunkle believes that lumber from H 324 might have been used by Ray Garrett in constructing H 323 or the unnumbered shed shown east of H 323 on Sheet 80 in the book of maps in the University Archives.
